

# Is a CDE Right For Me?

Do you have visibility over your current information management processes?

Do you spend most of your time looking for relevant docs and are unsure if you're working from the latest revision?

How do you maintain collaboration across the entire project supply chain and ensure expectations are met?

What do you do to drive standardization across your business to improve overall performance?

Do you know if your hard copy information meets the set standard?

What measures do you take to boost quality and keep projects on schedule?

Is your tech stack suitable to meet your current and future needs?

How long has it been since you reviewed the construction technology market?

How is your current technology positioned against the current market industry leaders?

What is your construction project roadmap like for the next 6-12 months? How are you feeding into this and is it aligning with your current systems?
